Biochemistry and Molecular Biology Education (BAMBED)

Donald Voet

Chemistry Department, University of Pennsylvania, Philadelphia, PA 19104, USA

Biochemistry and Molecular Biology Education (BAMBED) is a journal that is a publication of the International Union of Biochemistry and Molecular Biology (IUBMB) and is published by the American Society of Biochemistry and Molecular Biology (ASBMB). BAMBED, as its name indicates, publishes articles of interest to educators in biochemistry and molecular biology. These include invited reviews on subjects not yet in textbooks, discussions of curricular development, new laboratory exercises, and articles on educational research. BAMBED also publishes Features on Problem-Based Learning (PBL), Biotechnology Education, and Multimedia in Biochemistry and Molecular Biology Education. An important aspect of these articles is that their educational effectiveness must be assessed. I shall discuss in greater detail the types of articles that BAMBED publishes and the criteria used for accepting them for publication. Conference attendees are encouraged to submit articles to BAMBED.
